

AirDroid Business for Digital Signage Management

Monitor screens and usage of any Android-based digital signages. Remotely troubleshoot, automatically update apps, or restrict device use. Learn how to use AirDroid Business to manage your business' remote devices more efficiently.

Solution Overview

AirDroid Business MDM for digital signage management helps vendors and system integrators manage and troubleshoot customer signage devices remotely. By always staying up-to-date with every signage player and responding to issues instantly, you can ensure minimal device downtime, reduce support efforts, and increase overall customer satisfaction for the long term.

Managing Digital Signage in the Mobile Age

Key Features at a glance

- Remote control & troubleshoot digital signage device issues
- Monitor device resource usage and health
- Set up alerts to get notified when HDMI connectivity is lost, battery and storage space depleting
- Simplified device enrollment & initial provisioning
- Schedule remote auto or periodic updates on the device
- Configure & lockdown devices with single-app Kiosk Mode

Supported Android Devices

There are various digital signage on the market to meet different business needs. AirDroid Business can help you manage and monitor Android-based devices.

- **Retail** - Self-service cash registers, weighing machines
- **Catering** - Self-service kiosk
- **Healthcare** - Self-printing report equipment
- **Government Affairs** - self-service system, self-service form filling, streaming media broadcast control system

Hardware challenges

Digital signage players need to stay running 24/7 to maximize the ROI, but the biggest challenge is getting updated with various incidents and events that might cause players to shut down or stop working.

- Player online/offline status
- Player enrollment, provisioning, grouping
- Player resource usage monitoring
- HDMI port connectivity status

Software challenges

Apps on the device need to be kept running and optimally configured, which includes updates for new features, security patch updates, and correct system settings.

- Keeping your CMS app updated
- Checking if contents are displayed correctly
- Troubleshooting device issues and resolving them
- Preventing misuse, loss, and theft of the player

AirDroid Business Digital Signage Solution

Easy Provisioning & Management

For enterprises deploying a large number of devices, being able to quickly and automatically enroll and provision devices in bulk are crucial. Instead of individually setting up each device, IT admins can:

- Batch enrollment for new players
- Automatically enroll and deploy device provisioning
- Create player groups for easy management
- Remotely perform actions on players in bulk
- Schedule tasks with various timed options
- Invite & manage user activities and access rights

Remote Troubleshooting

Access any device in the field by remotely connecting & controlling it. Remote troubleshooting lets you quickly resolve issues and minimize downtime:

- Remote troubleshoot, control, and reboot player
- Hide remote IT operations during remote maintenance with Black Screen Mode
- Adjust player's settings: display orientation, volume, brightness, etc
- Desktop and mobile support as the controller

Remote Signage Player Monitoring

Remotely monitor all signage players across the deployment using the dashboard, providing all the information you'll need on device status and resource usage:

- Remotely view player screens
- Keep track of player usage: network traffic, storage, battery, CPU status, etc
- Real-time player location tracking with geofencing
- Monitor any unauthorized apps with data usage via detailed reports

Alerts & Reports

By setting alerts, you are able to anticipate and identify issues in advance, so you do not have to waste time and resources on issues that can be prevented:

- Email notifications with event triggers
- Automate follow-up tasks (e.g., device lockdown & broadcast messaging) when an alert is triggered
- Hardware connectivity status, e.g., HDMI cord
- Devices' online/offline & MDM connection status
- Battery and storage status

System Requirements

AirDroid Business Client (Controller)

- Windows PC (Windows 10, 8, 7)
- macOS (10.9 or above)
- Android (4.1 or above)
- iOS (10 or above)

Biz Daemon (Installed on controlled device)

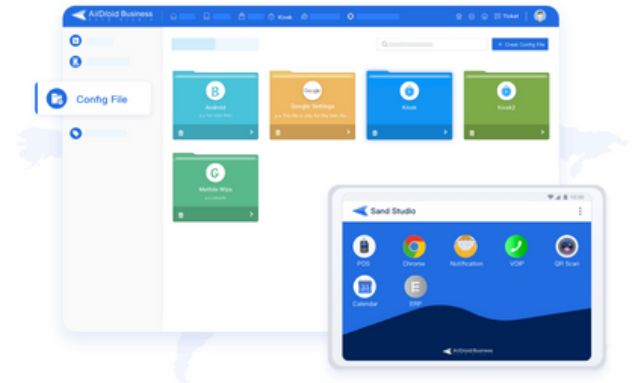

- Android (4.1 or above)

AirDroid Business Digital Signage Solution

Restrict & lockdown app (Kiosk & Policy)

Policy & Kiosk offers a way to lock and restrict player apps and operations to ensure the device can run continuously. This helps prevent misuse, tampering, or theft especially when the devices are used in public areas.

- Create strong policies and device settings to meet policy compliance and protect data
- Set unlock passwords to prevent unauthorized exit from Kiosk mode
- Use Kiosk Mode to lock down signage players to single or multiple apps
- Restrict end-user access to insecure apps, websites, or system setting
- Customize device notification center and home screen design for branding

Automatic app update & install (AMS)

Manually updating each signage player can be time-consuming. Use our Application Management Service(AMS) to remotely publish and install apps on your signage players, schedule updates, or split a big rollout into different batches to minimize risks:

- Automatically update without help from the other side
- Perform staged rollout based on time zones or groups
- Test and schedule updates
- Manage your private enterprise app store/managed Google Play store
- Monitor update progresses and results

Licensing and Subscription FAQs

Q Can I upgrade after purchase and how is it calculated?

A Yes, the price is prorated based on the cost of the upgrade plan and the remaining time.

Q What are the costs for device amounts more than 200?

A If you have a large number of devices, talk to us, there may be special rates available for you.

Q Can I pay by installments?

A Installments are not accepted at this time to facilitate customers' annual budget considerations.

Q Can I downgrade when I renew my contract?

A Yes, but please note that you will lose access to functions that may be critical to your operation after downgrading.

Q Are there any benefits for non-profit organizations?

A Yes, we encourage and support non-profit organizations. To learn more, please contact our sales team.

Q Are there any suggestions on the right plan for me?

A You can get a free consultation on products, solutions, or deployment by talking to our sales team.
