

# Mobile Device Management Solution for Android & Windows Devices

Remote control, device management, monitoring, and many other productivity tools are integrated in one solution to empower the modern workforce.

## Solution Overview

AirDroid Business is an all-in-one platform that provides powerful tools to ensure service availability, simplify operations, and save cost for your business. We are designed for businesses of all sizes and diverse device types including POS, digital signage, phones, tablets, desktops, rugged and custom devices.

## AirDroid Business Key Capabilities

### Remote View & Control

Your support team can remotely access and troubleshoot a device without being onsite.

- Save travel and overhead cost
- Support more devices, easier and faster
- Reduce device downtime

### Alerting System

Always stay ahead of the game – create alert triggers and receive notifications when something critical happens to your devices, so you can respond to events faster. The triggers include data usage, online/offline status, battery usage, device temperature, storage capacity, device movement, and more.

### Effortless Device Monitoring

The traditional way of checking up devices one by one no longer works for today's modern businesses. AirDroid Business provides an intuitive dashboard and powerful tools to show everything you need:

- The most recent device screens
- Monitor data usage to prevent surging costs
- Health indicators – online status, temperature, storage availability, and more
- Download and analyze reports for improvements

# AirDroid Business Key Capabilities

## All-Around Security

AirDroid Business comes with a library of security measures that ensure data and device security. Some of the capabilities include:

- Advanced data encryption
- Two-step verification to authenticate logins
- Remotely lock and reset devices
- Limit user access to apps and settings
- Ensure secure browsing

## Easy deployment & bulk operations

For enterprises deploying many devices, it's crucial to quickly provision and enroll devices in bulk. Instead of individually setting up devices, IT admins can:

- Leverage flexible enrollment options, including Device Owner, Android Enterprise, Zero-touch enrollment, Knox Mobile Enrollment and Quick installation service.
- Bulk file distribution
- Quick installation for large deployment \*
- Perform actions on multiple devices, including rebooting devices, turning device screens off, sending notifications, group transfer, adding tags, clearing App data & cache, launching the App in the foreground, Factory Reset and unenrolling devices

## Device & browser lockdown

With Kiosk Mode, you can restrict user access to apps, websites, and system settings in a controlled environment. Lockdown devices to prevent unnecessary use, reduce support cases, and increase device security:

- Single and multi-app mode
- Secure browsing with website whitelist
- Customizable device interface, notification center, app icons, and more

## App Management Service (AMS)

App Management Service is a zero-touch app management solution that doesn't require deep IT knowledge. Instead of manual update, the entire process is fully streamlined and automatic.

- Automatically deploy apps and updates
- Monitor update progress and result
- Silently install apps by force
- Create your own enterprise app library

# AirDroid Business Key Capabilities

## Geofencing & location tracking

Track location and path history of onsite vehicles and personnel. Set up geofences to trigger notifications when a device enters or exits the geofenced area.

- Monitor device movement
- See your assets in one place
- Improve route efficiency

## Patch Management

Patch management is crucial for enterprises to manage their devices. It provides an effective way for IT admins to manage patches to system avoid vulnerabilities and protect devices' security.

- Identify the patch that needs to be updated
- Update patches for all managed devices in bulk
- Check patches that are available to install on devices
- Remotely reboot the devices to effect the update patch
- Monitor the patches that failed to update

\* For automatic installation and enrollment for large deployment, please contact our sales team ([sales@airdroid.com](mailto:sales@airdroid.com))

# Licensing and Subscription FAQs

**Q** Can I upgrade after purchase and how is it calculated?

**A** Yes, the price is prorated based on the cost of the upgrade plan and the remaining time.

**Q** What are the costs for device amounts more than 200?

**A** If you have a large number of devices, talk to us, there may be special rates available for you.

**Q** Can I pay by installments?

**A** Installments are not accepted at this time to facilitate customers' annual budget considerations.

**Q** Can I downgrade when I renew my contract?

**A** Yes, but please note that you will lose access to functions that may be critical to your operation after downgrading.

**Q** Are there any benefits for non-profit organizations?

**A** Yes, we encourage and support non-profit organizations. To learn more, please contact our sales team.

**Q** Are there any suggestions on the right plan for me?

**A** You can get a free consultation on products, solutions, or deployment by talking to our sales team.
