

# AirDroid Business for POS & Self-Service Kiosk

Remotely troubleshoot POS and self-service kiosks to reduce downtime. Monitor device's health and resource usage and set up automatic staged rollouts for releasing app updates to minimize risk and impact to the business.

AirDroid Business MDM for point-of-sale devices and selfservice kiosks is an all-in-one platform for keeping devices up and running, so you or your customers can take advantage of the new wave of POS revolution post the pandemic.

## Managing Point-of-Sale Services in a Post-Pandemic World

### Support for mobile & contact-less POS & Kiosk machines

AirDroid Business supports different devices, whether it's mobile POS tablets at restaurants or self-service checkout kiosks at supermarkets:

#### 1 Restaurants

- Self-ordering tablet
- Kiosk
- Traditional and mobile POS

#### 2 Shopping malls & supermarkets

- Cashier POS terminal
- Self-checkout kiosk
- Vending machines
- Parking payment machine

#### 3 Retail stores

- Mobile/handheld POS
- Tablet POS
- Self-service checkout machine

### Challenges for in-house IT Teams & Service Providers

Point-of-sale systems and self-service kiosks are at the center of a new (and post-pandemic) retail experience. Keeping these devices up and running at all times is the no.1 priority for businesses:

- 1 The downtime directly impacts sales & operations
- 2 Provide instant support for non-tech savvy staff
- 3 Monitoring the health of hundreds of devices across cities, regions, or even countries

### Key features at a glance

- 1 Remotely control devices & resolve issues instantly
- 2 Set Policy & Kiosk to reduce improper use
- 3 Communicate with on-site staff with voice chat
- 4 Monitor POS system health & resource usage
- 5 Get alerts when POS devices aren't working properly
- 6 Automatically rollout app updates across devices
- 7 Put POS devices & kiosks into groups and locate them

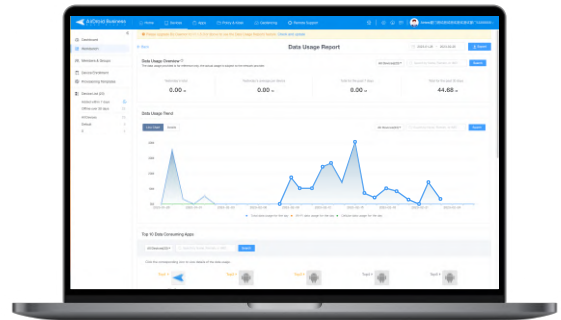

# AirDroid Business

## Mobile & Contact-less POS Management Solution

### Identify incidents early, proactively

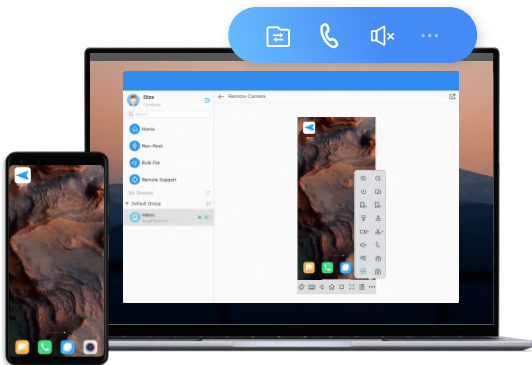

You can remotely monitor POS & kiosks using the dashboard, giving you all the information you need on device status and resource usage. Set up alerts so you can prevent issues from getting out of hand, and download reports to analyze data usage for improvements:

- Remotely view device screens & locations
- Receive alerts when devices aren't working
- Resource usage & health indicators – device storage, memory, temperature, and battery status
- Download reports to further make improvements

### Respond to issues fast, remotely

You can remotely access any device in the field by directly controlling it. Remote troubleshooting lets you quickly resolve issues and minimize downtime:

- Remotely control and troubleshoot a device
- Communicate with onsite staff using voice chat
- Inspect hardware issues using Remote Camera

### System Requirements

#### AirDroid Business Client (Controller)

- Windows PC (Windows 10, 8, 7)
- macOS (10.9 or above)
- Android (4.1 or above)
- iOS (10 or above)

#### Biz Daemon (Installed on controlled device)

- Android (4.1 or above)
- Windows (10 or above)

## End-to-end security

AirDroid Business offers a library of security measures from the account level, remote session, to application access, so you or your customers can have peace of mind when remotely managing the devices:

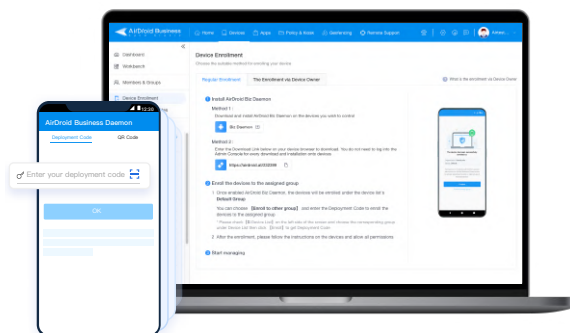

- Advanced encrypted during remote sessions
- Account two-step verification & access rights
- Restrict remote access from the device's end
- AirDroid servers are placed in ISO 27001 compliant data centers

## Streamline management tasks

For enterprises deploying many devices, it's crucial to streamline the day-to-day management tasks, especially when you have a fleet of devices in the hundreds:

- Quick enrollment & organize POS devices into different groups, automate configuration
- Preset policies to batch devices
- Install or update apps simultaneously
- Perform bulk device actions
- Create tasks & execute frequently and regularly
- Send custom notifications to remote devices

## System Requirements

### AirDroid Business Client (Controller)

- Windows PC (Windows 10, 8, 7)
- macOS (10.9 or above)
- Android (4.1 or above)
- iOS (10 or above)

### Biz Daemon (Installed on controlled device)

- Android (4.1 or above)
- Windows (10 or above)

## Simplify the user experience

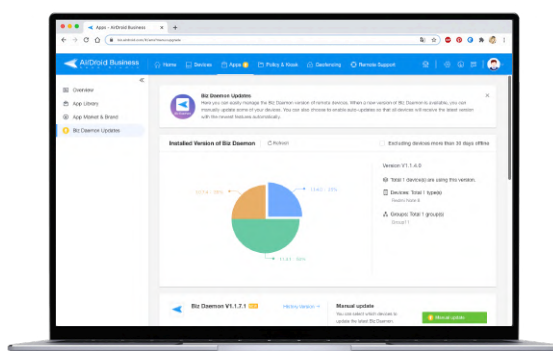

Kiosk Mode is a way for you to run a specific app on full screens, such as the ordering app, on your mobile device. It also prevents anyone from accessing the device, switching apps, or changing settings.

- Set password to prevent Kiosk Mode from exiting
- Restrict access to apps, websites, and system settings
- Full screens and single-app mode (eg: order app on the tablet)
- Customize your interface and show your brand

## Keeping your systems updated

**Application Management Service** is an intuitive app update solution to help you streamline app rollouts across devices. No longer do you need to manually perform the update or ask staff or customers for help:

- Non-IT professionals or staff can operate with a simple interface
- Automatically push apps or updates to selected devices
- Roll out updates based on device groups or time zones
- Track the update process and see the result on a dashboard
- Create enterprise private app store/managed Google Play store to make it easier to manage enterprise apps

## System Requirements

### AirDroid Business Client (Controller)

- Windows PC (Windows 10, 8, 7)
- macOS (10.9 or above)
- Android (4.1 or above)
- iOS (10 or above)

### Biz Daemon (Installed on controlled device)

- Android (4.1 or above)
- Windows (10 or above)

# Licensing and Subscription FAQs

**Q** Can I upgrade after purchase and how is it calculated?

**A** Yes, the price is prorated based on the cost of the upgrade plan and the remaining time.

**Q** What are the costs for device amounts more than 200?

**A** If you have a large number of devices, talk to us, there may be special rates available for you.

**Q** Can I pay by installments?

**A** Installments are not accepted at this time to facilitate customers' annual budget considerations.

**Q** Can I downgrade when I renew my contract?

**A** Yes, but please note that you will lose access to functions that may be critical to your operation after downgrading.

**Q** Are there any benefits for non-profit organizations?

**A** Yes, we encourage and support non-profit organizations. To learn more, please contact our sales team.

**Q** Are there any suggestions on the right plan for me?

**A** You can get a free consultation on products, solutions, or deployment by talking to our sales team.
